Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost, nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment—just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

CLARESHOLM LOCAL NEWS

Born, on February 12, to Mr. and Mrs. W. S. Keeley, a son.

Mrs. Hamblin is reported very seriously ill from blood poisoning.

Mrs. T. D. Lang, of Prairie River, Sask., is here visiting her sister Mrs. T. Chilton.

Mr. and Mrs. T. C. Milnes have returned from California where they have been visiting relatives.

T. Chilton returned last Friday from the States where he was called by the illness of his mother.

Argyle municipality is reported to be in such an excellent financial condition that there will be no need to levy taxes for 1925.

Carl Braren's rink is participating in the Banff bonspiel this week, and incidentally enjoying other features of the big winter carnival.

Mrs. E. G. Barber and daughter Mrs. McKinney left last Friday for Raymond where they will visit with Mrs. Longman for several weeks.

Mr. and Mrs. W. H. Lewis and Mr. and Mrs. A. L. Lewis returned on Tuesday from Minneapolis where they have been visiting for the past six weeks.

All who are interested in the formation of a Rifle Club are requested to meet in the G. W. V. A. club rooms at 7:30 p.m. on Friday, February 20.—E. G. Studd.

Any winners of special prizes at the school fair who have not received their prizes are requested to communicate without delay with the secretary, Rev. W. C. Marsh.

The Review has received a letter from Major School in which he states that oil has been found at Bayville, Texas, at which point he owns land. There is an oil boom on there now, he says.

On the evening of February 17 the Clareholm High School Dramatic Society will present the comedy "Aunt Susan's Visit" at the Rex theater. Curtain rises at 8:30 sharp. Tickets will be on sale next week.

Mr. George Davies and Miss Carrie McLurray, of this district were united in marriage at Lethbridge on January 20th. They will make their home in the Star Line district where the groom is engaged in farming.

Services will be held at St. John's church on Sunday next, February 15th, as follows: 11 a.m., morning prayer and sermon; noon, Sunday school; 7:30 p.m., evening prayer and sermon. A hearty invitation is extended to all.

Willie Dahlin, five year old son of Mr. and Mrs. E. J. Dahlin, living five miles northwest of town, died on February 10th of diphtheria. Burial took place Thursday. The sympathy of all is extended to the family in their bereavement.

The young people of Clareholm are promised a special treat on Sunday afternoon next when Mrs. Nellie McClung will give her special address to young people in the Methodist church at 3 o'clock. Special music will be rendered at this meeting and all young people of the community are cordially invited to be present.

January went out and February came in with a cold snap. The mercury dropped to 20 below zero on the 1st day of January and also on the first day of February. Since then the weather has been mild and springlike most of the time, 15 above zero being the coldest. There has been no precipitation of moisture the past week; there was about an inch of snow during the previous week.

There was a healthy interest shown in the town election on Monday last, a heavy vote resulting. George Ringrose was elected mayor for a third term, polling 155 votes. Archie Hutton for mayor polled 74. For councillors the vote was as follows: John Walls 160, T. M. Soly 154, Geo. Maxwell 123, J. W. Jullien 108, John Elverum 95, Walls Soly and Maxwell being elected. There were two blank ballots cast for mayor, and 16 spoiled ballots for councillors, some of which were slumbers and some being marked for more than the required three.

The visit of Mrs. Nellie L. McClung to Clareholm this coming Sunday, February 15, in connection with the anniversary services of the Methodist church, is being anticipated with very special interest. Mrs. McClung will speak in the afternoon at 3 o'clock, and in the evening at 7:30 o'clock. Mrs. McClung will also lecture in the church on Monday evening, following the dinner in Harrison Hall, on the subject, "The Humor of Every-day Life. Citizens will do well to keep all these occasions in mind.

Radio Dance Put on by Cornforth U. F. A.

A very successful radio dance was held in the Cornforth school house on the 6th inst. The music was furnished by a Calgary orchestra, broadcast by C.F.C.N. Grant, "the old reliable C.F.C.N. All. McAlister demonstrated a five tube Atwater-Kent radio set to perfection. Even the pessimists had to admit it was "better than they expected." The "old reliable" music in at 10:30, lasted till 2:30, then Messrs. Foster, Ringheim and Thompson furnished jazz till the roosters began to crow. The night was perfect and we had a good turn out and the crowd was so jubilant over the success of the music they insisted on engaging Mr. McAlister and his Atwater-Kent again for February 20th. During the evening the locals phoned Mr. Clark expressing their appreciation of the way the music was coming in and he replied by broadcasting their message immediately. "The Cornforth Local appreciates the distinction of being the first in the district to stage a successful public radio dance, and we will testify to the efficiency of Mr. McAlister's receiving set.

Alberta Registered Seed Grain for Sale

Registered and No. 1 Marquis and Ruby Wheat and Victory and Banner Oats are offered for sale by the Provincial Cleaning and Grading Plant, Edmonton

For prices and particulars apply to W. J. Stephens, Field Crops Commissioner, Department of Agriculture, Edmonton, Alberta.

Canada's Wheat Yield Higher Per Acre Than Any Other Wheat Exporting Country

Some interesting facts on the wheat fields of Canada are given in a statement recently published by the Canadian Federal Department of Agriculture, which in part reads as follows:—

"As the value of the wheat crop on the prairie is normally about fifty per cent. of the total value of the entire annual agricultural production of the prairie provinces, it is interesting to learn how the yields of this important crop in Canada compare with those in other countries. Briefly stated, Canada has a much higher average yield per acre than any other important wheat exporting country. Some countries which import wheat have a higher average yield per acre than Canada, but these are only a few of these, such as the United Kingdom, Germany and Denmark, which have a yield considerably higher than the total quantity produced by these countries is relatively very small. Moreover, the expense of producing wheat in these countries is extremely high. Even such an important wheat producing country as France has an average yield of only one-fifth as high as Canada, while both Italy and Roumania have lower yields than Canada."

The average yield per acre of wheat, over a period of 22 years, for the following chief exporting countries of the world, is as follows: Canada 17.8 bushels; United States 13.1; India 12.5; Argentina 10.2; and Australia 10.1. In Russia the average yield over a period of 15 years was 9.1 bushels per acre. It will be seen, therefore, that Canada enjoys some considerable advantages over other exporting countries. This advantage is due in part to a natural abundance of wheat in the soil and to the fact that Canada, and also, to improved methods of cultivation as well as to better varieties of wheat which have been introduced by scientific agriculture.

Canada's Livestock Industry

Value of This Industry in Canada Today Approximately One Billion Dollars

Canada's livestock industry is on the up-grade again, seven years after the war, as H. L. Giesdale, Deputy Minister of Agriculture at Ottawa, told the Western Canada Livestock Union convention. The value of this industry in the Dominion today approximates one billion dollars and is fast increasing, he said. Industry related that it took the livestock ten years to recover from war's effect, but in Canada this recovery has taken only seven years.

Increased Butting Production

Mixed Farming Apparently Gaining Headway in Saskatchewan

Butt butting production in the province of Saskatchewan during the month of November totalled 72,900 pounds, as compared with 45,425 pounds in the same month a year ago, an increase of 25,145 lbs., according to a statement issued by the Provincial Department of Agriculture. The cumulative production for the first eleven months of the current year amounted to 1,221,126 lbs. as compared with 1,042,816 lbs. in the preceding period.

Exports of Wheat

Seventeen Different Countries Purchase Wheat From Province

Canada exported 26,982,000 bushels of wheat to 17 different countries during the month of November, according to a report of the Dominion Bureau of Statistics. Next to the United Kingdom, which took 2,047,000 bushels, the next best customer was France, who took 1,662,000 bushels. Germany took 1,292,000 bushels, Japan 976,000 bushels, Russia 850,000 bushels, Latvia 785,000 bushels and British South Africa 745,000 bushels.

Mining in British Columbia

Output Value of Forty-five Million Dollars For 1924

According to a statement by Hon. William Stuart, Minister of Mines for British Columbia, the value of the province in 1924 has broken all records for production in the history of the province. The value of the output of the mines of British Columbia, for the year 1924, is officially estimated to be \$45,116,255. This is an increase over the 1923 figure of \$31,516,255. The increase in the production of the metalliferous mines of the province was 100 per cent. The leading features of mining activity during the past year. The metal mines have given a production valued at \$23,210,000, as compared with \$20,757,000 in the previous year.

Visitor To Canada Deplores Pessimism

Sir Campbell Stuart Urges Canadians To Have Courage of Ancestors

"The course of an honest trip through Canada," stated Sir Campbell Stuart, a native of Montreal, and now residing in London, England. "There is an address before the Canadian Club at Ottawa. I have encountered a certain feeling of pessimism. Those who preach pessimism forget the courage and privations of your father and mine. After all, a pessimist is a coward. To be a pessimist, he can only do so by the doctrine of despair."

"The course of an honest trip through Canada," stated Sir Campbell Stuart, a native of Montreal, and now residing in London, England. "There is an address before the Canadian Club at Ottawa. To be a pessimist, he can only do so by the doctrine of despair."

Britain's Fabulous Mineral Wealth

Twelve Thousand Million Tons Extracted Up To Present Year

Although the underground wealth of such countries as China, Australia, Brazil and the United States is great, the greatest treasure of all is that of the British Isles. It is estimated that up to the present year the mineral output extracted from the United Kingdom has been the equivalent of a total of 120 tons for every acre of its extent. This works out to twelve thousand million tons, a figure which the human mind is incapable of grasping.

Moreover, with the immense improvements in machinery—with compressed air, hydraulics, and electricity as helpers—mines which seemed exhausted are again workable, and the output is being increased at a greater rate than ever.

Built 52 New Elevators

Saskatchewan Co-operative Elevator Company Has Now 435 Elevators

The Saskatchewan Co-operative Elevator Company has now 435 elevators, constructed last year by the Saskatchewan Co-operative Elevator Company. Limited, a farmers' organization, making a total of 435 elevators in Saskatchewan owned and operated by the British Isles. It is estimated that there are, however, 2,425 country grain elevators in the province. In the United States, 1,425 elevators in the Dominion, making the grand total of grain elevators 4,180.

Manitoba Fish For U.S.

An indication of the importance of the fishing industry is given in statements in the press to the effect that close to 50,000 pounds of Manitoba lake fish are being shipped weekly to New York and Boston. The fish are caught principally in Lakes Winnipeg and Winnipegosis, and there being no demand for the fish in New York and Boston, some years ago, the demand has continued to increase.

Beatty and Wankin Honored

E. W. Beatty, C.R. President and J. W. Wankin, C.R. Vice President of the Railway and Electric Company, who has just returned as executive assistant of the same company, were honored by the Northwest Co-operative, when they were decorated with the order of St. John for signal services rendered to that country.

Thousands of migrating birds are killed every year by smoking tin. Hundreds.

Next to agriculture, fishing is the most important source of food. The rose is the emblem of immortality to the British.

Retting Flax Straw For Fibre

New Method Called The Kays Process Has Been Tested

There has been little change in many years in the system of retting flax and hemp for the production of fibre for manufacturing purposes. It has long been the custom to spread the hemp or flax straw on pasture fields for dry retting or submerged retting in ponds. The two methods are slow and unprofitable, while large amounts of straw must be retted, few methods of retting are being studied. The Kays Process, as the Experimental Farms has made a test of a new method called the Kays process. It involves the addition of a bacterial culture (the retting water, which is kept at 72 degrees Fahrenheit). The work was done during the winter months. The drying of the crop after the retting had been completed was done in a room kept at a temperature approximately 55 degrees F. This induced slightly less drying to prevent injury to the fibre. After drying was completed, the straw was broken and sent to the mill. The fibre obtained by the method of retting was not very green in color and although of good strength was of a harsher nature than is favored by spinners.

Will Hold Resources

Provinces Masters of Natural Resources and Soil Says Quebec Premier

With the declaration that public opinion in Quebec is with him on the expedition, Premier Taschereau declared in the legislature that the province would fight to the death on the part of the federal government to export hydro power. He declared that any contracts entered into in this regard would be null and void. He said that the province is rich in the contracted parties, and suggested that United States interests be established their claim to the province. He said that the province is rich in the contracted parties, and suggested that United States interests be established their claim to the province. He said that the province is rich in the contracted parties, and suggested that United States interests be established their claim to the province.

"I believe that the province are masters of their natural resources and their soil," stated the premier. "It is a very difficult matter for the federal government to reach out and matters, necessarily in a general way, when such provision might suit one province and be disastrous to the other. In my opinion it is absolutely necessary to define the rights of the two authorities, provincial and federal."

Saskatchewan Coal

Yearly Output From Mines Gradually Increasing

The Saskatchewan coal fields, while not yielding the quantities of the mines of Alberta, are nevertheless estimated to contain some 60,000,000,000 tons. The development of these great fields has been so rapid that the output is being increased annually. In 1922 the total annual production was 25,000 tons, or 25,000 tons over the year previous. In 1923 the total was 43,100 tons, or an increased production of 55,000 tons over the year 1922. In 1924 the total will show the rate of increase to be maintained with a total production of over half a million tons.

Lumber In Toys

Lumber To Value of \$50,000,000 Used Each Year in U.S. For Toy-making

The statement is made that more than 200,000,000 feet of lumber go into the making of toys. It is stated that nearly 80 establishments in the United States take orders from Santa Claus. One manufacturer of toys in New York state uses 2,000,000 feet of lumber every year and the total value of the products of the industry in all parts of the United States reaches \$25,000,000. That takes a tremendous number of trees, the American Toy Association is pointing out in a booklet calling attention to its argument for reforestation.—Buffalo Express.

A Boomerang

Says Those Who Lessen Production Help to Reduce Stocks of Wheat

J. H. Clapp, Lord Privy Seal and Deputy Leader in the British House of Commons, in the recent Labor Conference, speaking at Leeds, recently said that work done by the government reduced the volume of the national production of wheat. He said that the work done by the government was reducing their own chances of raising the standard of living.

Out Of Final Contest

The old campaign was a trade he had to mention the laborer's right. "Are you the groom?" he asked a naturally looking man. "It was estimated in the preliminary trials."

Sound Bad

Physician Professor (examining horse). "Tomorrow start with lightning and go to thunder."

Britain's Well-Beloved Actress

Ellen Terry, who became a Dame of the Order of the British Empire, at the New Year's distribution of honours.

Ellen Terry, who became a Dame of the Order of the British Empire, at the New Year's distribution of honours.

Mineral Production in Canada

Total Estimated Value Is Placed At \$205,462,000 For 1924

The total estimated value of all mineral production in Canada during 1924 was \$205,462,000, according to a preliminary estimate recently issued by the Dominion Bureau of Statistics. Gold, lead and zinc production in Canada reached new levels last year, while silver, nickel and copper showed gains in production over 1923. It was a great year for the mines, for the value of primary metals produced in Canada in 1924 reached \$85,000,000—an advance of nearly \$1,000,000 over the total value for 1923.

Gold production reached \$12,500,000 in value, valued at \$12,500,000; Ontario mines contributed 1,230,000 ounces. Silver bullion was 1,700,000 ounces, valued at a total of 20,260,000, valued at \$12,610,000; one-half of this was from Ontario. The value of nickel production advanced from 41,000,000 to 69,200,000. Copper production reached a total of 101,265,000 pounds, or 16 per cent. above the 1923 production. Lead's established a new high level in 1924, 715,750 pounds, and zinc reached a new level at 200,000.

Scotland Protects Forests

Does Not Want to Depend on Foreign Timber

Over 100 millions of young trees and seedlings are in the nurseries of the Forestry Commission in Scotland. These are to be utilized to make good the denudations of the war and to keep on as far as possible the country's dependence upon foreign timber. During the war 25,000 acres of woodlands in Scotland were denuded of their crops. The Forestry Commission, which started operations a year after the Armistice, has already afforested 14,000 acres, and has another 4,500 acres on the programme for this season.

Alberta Highways

Four Hundred Miles of Main Roads Completed

About 100 miles of main highways were completed in Alberta during 1924 under the five-year programme authorized by the legislature last season, which contemplates a total expenditure of \$5,000,000. The work was done on the chief north-south routes in the province, and as a result a total of \$250,000 has been earned from the sale of the Federal Aid Grant. Next year's programme contemplates the building of about 500 miles of highways.

Exports To Orient

Albera Is Developing a Considerable Export Trade in Products

During the past three years there has been a considerable growth in export trade from the Orient to the Orient. During the period January to October 31, 1924, 126 tons of meat, 525 tons of butter, and 12,500,000 bushels of grain were shipped to that market, as compared with 26 tons, 125 tons and 4,200,000 bushels respectively, in the whole of 1922.

Settlers For Alberta

Nearly ten thousand people reach Alberta each year, and during the month of November last year, and November inclusive. A total of 6,455 came from overseas and 2,809 from the United States.

Railway Ties For Britain

A billion of the wooden ties of railway ties, or sleepers, has been received by British Columbia saw mills. The ties are to be used in the Orient. At the present time saw mills in the province have on order 20,000,000 feet of railway ties to be delivered by the end of next March.

There are times when it is better to be injured upon than to fight.

Scientists Predict Great Drought Over The Whole World For The Year Just Commenced

Freight Was Cancelled

Steamship Company Forgoes Charges On Celebrated Clydesdale Horse Presented to Saskatchewan

The Aberdeen-Dundee line of steamers have cancelled the freight on Clyde Fyvie and the cost of building the special ship which this Clyde steamer occupied on the trip from Scotland to Canada, it was announced by Hon. C. M. Hamilton, Provincial Minister of Agriculture. In a letter received by Robert Simpson from D. S. MacNair, Freight Manager of the Aberdeen-Dundee line, Mr. MacNair stated:

"Under the circumstances of the horse shipped by the Concocha being a prize animal, and the fact that John Cooke and Mr. James Kliggart, we think we might joint them in a small measure in foregoing the freight and cost of the ship. This ship, as you know, was specially built and cost us well over \$100,000."

This generous co-operation of the big Scottish shipping company, in bringing Clyde Fyvie free of cost to Canada, is highly appreciated by the Department of Agriculture and the University of Saskatchewan, stated Mr. Hamilton, and ought to convince of the fact that the Scottish race as inclined to be easy with their people who Scotland can also be proud to have a share when the season warrants."

Shipping More Cattle

Thirty Thousand Head Sent To United Kingdom Last Year

Fifty per cent. of the cattle exported to the United States for the year 1924, were sent by the Dominion of Agriculture. All told 81,000 cattle were shipped, as against 57,672 in the preceding year. During the last week of 1923, there were 1,000 cattle shipped, a high increase over the last week of 1922.

Throughout 1923 the rate for new cattle was \$20 per head and all the traffic was handled by private steamship lines and the Canadian Government. The bulk of it was carried by the White Star line, one of the three private companies.

This represents a revenue to the shipping companies of \$1,620,000. There are indications that the export movement will continue strong during 1925. Shipping companies report heavy bookings for the remaining winter months.

British Farmers Object

Recent Proposal of Baldwin Government to Facilitate Imports

Competition from any quarter is not welcome, according to British farmers to more welcome it to the Dominion than from foreign lands. The "Farmers' Union" of Great Britain is in arms against the proposal of the Baldwin Government to spend \$1,000,000 a year to facilitate the import of wheat, most and toll, and to the Dominion. In Canada many farmers who feel the pinch of British competition would take the same attitude if it were proposed to make further reductions in the tariff on British goods. These difficulties are inherent in any system of preferential trade, but are conveniently overlooked by those who talk superficially of the Empire together by force. —Toronto Globe.

Tell Of Great Lakes 1924

Thirty-seven lives and 15 boats, the greatest in a number of years, were lost on the Great Lakes during 1924. The worst disaster occurred during the great loss of life was the steamer "Clifton," which foundered in Lake Huron during the week of September 21. 25 members of the crew and 2 passengers going down with the ship.

According to science, hair grows after death; but this is damned little satisfaction for a bold man.

A horse is a man who has nothing to do but stand around and wait.

FREE

A Farm Library

One would often give much to be able to lay his hands on directions for treating seed for smut, preparing a ration for a young horse or for doing a hard and one other kinds of things about which he has read and a proper system of preserving the farm pamphlets and books, such a need at all times. Such a system has been devised by the Department of Agriculture at Ottawa. It is fully explained in THE PUBLICATIONS INDEX BOOK, in which the pamphlets of the Department

The Year 1925 Will Be the Driest

Since the year 1925 will be the driest the year since the British Meteorological Department told the Associated Press in expanding a new discovery which devastated the British Isles, made which, it is declared, enables them to pick out the wet and dry years to come.

This statement was made after much study on the part of weather scientists, and as the result of the discovery that a close connection exists between rainfall, particularly in Great Britain, and the frequency of solar prominences. The latter are most active in groups progressively in line with the sun's surface, sometimes to a height of 25,000 miles and at a speed of more than 150 miles an hour.

Experts have spent three years studying the solar activity, and have learned that the interval between the years when these giant fireworks are most active has grown progressively shorter during the last half century, while the periodicity of wet years in periods for 29 years has been found. The mathematical curves indicate a relationship that is too close to be a coincidence, say the department officials.

This relationship is nothing new. It was noticed about 1865, and for the next 25 years every British year was labeled as either being dry or normal. All this time the solar prediction of the year appearing regularity and normally. At the end of 25 years the flames appeared over and continued to appear at regular intervals. From 1910 to 1921 the flames were more active and alternate years were labeled as either being dry or normal. The droughty year of 1921 appeared to have been the turning point, for now the department experts have begun to say that for the next period of increased solar activity the years will be in cycles of three, two wet years and one dry year. The year 1922 is reckoned as the last year on the late period, therefore the years 1923 and 1924 have been the wet years, and 1925, if any fault can be placed in the constancy of the solar prominence of the sun, should be a dry one in England and a droughty one for the rest of the world.

The Grasshopper Hawk

It Has Been Found That the Sparrow Hawk Is Partial to Grasshoppers

That strange variety of the hawk known as the sparrow hawk, which has to undergo a change of name, is not so much a bird of prey as it is responsible for the manner by which it has been known up to the present time. It is now discovered to be an eater of grasshoppers, and the grasshopper hawk that has from time to time taken such toll of crops in the American West, has been proved the啄虫 of many specimens that have been made by the Department of Zoology at the Saskatchewan University and by the University of Toronto in ten years in various localities, including many of the states of the American West, have proved the grasshopper, when available, constitutes a considerable portion of the diet of the sparrow hawk, the remains of as many as forty grasshoppers having been discovered in a single specimen. It is now reported by Mr. H. L. Johnston of the Entomological Laboratory maintained by the Dominion Department of Agriculture at Lethbridge, Alberta, that a movement is on foot to change the name of the bird from sparrow hawk to grasshopper hawk.

According to science, hair grows after death; but this is damned little satisfaction for a bold man.

A horse is a man who has nothing to do but stand around and wait.

FREE

A Farm Library

One would often give much to be able to lay his hands on directions for treating seed for smut, preparing a ration for a young horse or for doing a hard and one other kinds of things about which he has read and a proper system of preserving the farm pamphlets and books, such a need at all times. Such a system has been devised by the Department of Agriculture at Ottawa. It is fully explained in THE PUBLICATIONS INDEX BOOK, in which the pamphlets of the Department

YOUR OPPORTUNITY To Better Yourself

There is a good living for you
right where you live. Full of
spare time. No capital required.
No experience necessary. We
teach you how to become a Na-
tional Representative, selling our
splendid line of top-to-toe clothing
for the entire family from fac-
tory direct to consumer through
local representatives. The National
"Store at your door" selling
outfit is a complete clothing
store in a neat, small sample case.
Experienced salesmen see un-
limited possibilities in our propo-
sition. Spring line now ready, big-
ger and better than ever. Assure
yourself an exclusive territory by
writing immediately naming the
district you want. Rural commu-
nities and city territories equally
unprofitable. "It is a sign of dis-
tinction to be a National rep-
resentative." Apply Sales-manager,

The first bills under the new
gas rate are being paid this week,
and in some instances patrons of
the gas company find their rate
increased by 140 per cent. If the
recent investors in gas stock get
a square deal from the company
their investment should at this
rate prove very profitable.

"The Humor of Everyday Life"
is the subject of the popular lec-
ture to be given by Mrs. Nellie L.
McClung in the Methodist church
on Monday evening, February 16.
This lecture was given recently in
Calgary and Edmonton, and is re-
ported to be one of the most pop-
ular lectures given in either city.

WARNING

Whenever a householder ascer-
tains or has reason to suspect that
a case of infectious disease, such
as smallpox, chickenpox, diphter-
ia, scarlet fever, polio-myelitis,
cholera, cerebro-spinal meningi-
tis, or typhoid plague, occurs in
any house in any district, the
householder or physician in at-
tendance shall advise near every
entrance a placard stating the
name of the disease, and report
same to the Local Health Board
within twelve (12) hours.

No person shall leave, nor
shall the contents thereof be
removed from such house, nor
shall such person hold any com-
munication that might result in
spreading the infection with any
person outside such house. No
person shall enter such house ex-
cept attendants, until such house,
furnishings and contents have been
properly disinfected and released
from quarantine.

Any person violating these regu-
lations shall on summary convic-
tion before a police magistrate be
liable to a penalty of not more
than fifty (\$50) dollars and costs.

W. G. Burch,
Secretary Board of Health

OSCAR FRANSEN

OPPOSITE QUALLY & YOKOM'S GARAGE

WESTERN MANAGER

THE rapid extension of the
colonization work of the Cana-
dian National Railway in
Western Canada, and the excellent
results obtained during 1924 under
the direction of Mr. E. A. Field,
Land Commissioner, have justified
the formation of plans for the
active extension of this work dur-
ing 1925, and some staff changes.
Formal announcement is now made
that during from January 1925,
Mr. Don St. Johnston is ap-
pointed Western Manager of the
department with headquarters at
Winnipeg, an appointment which
will meet with very general ap-
proval throughout eastern and
western Canada where Mr. John-
ston is favorably known as a first
class agricultural, stockman and
business executive.

Born on the Kinslesbury farm at
Bloomfield, near Winnipeg, in 1884,
which farm was at that time man-
aged by his father, Mr. Johnston in
his early years received a very
thorough training in agriculture,
both theoretical and practical. His
studies were pursued at Upper
Canada College, Toronto, O., and
Wycliffe College, Gloucestershire,
England, Ontario, and Toronto
University, from which institution
of learning he graduated in 1908
with the degree of Bachelor of
Science in Agriculture.

From the date until 1915 he was busy on the
farm as a practical farmer at
Neyre, Ontario, and South Rattle-
ford, Saskatchewan, gaining in
this period invaluable experience
of the farmer's problems as they
are encountered in actual prac-
tice. Having by this time acquired
a reputation as a stock raiser, he
was in August, 1915, appointed
Market Representative of the
Dominion Live Stock Branch at the
Union Stock Yards, St. Boniface,
and in 1918 Supervisor of Stock
Yards, charged with the enforce-
ment of the Live Stock and Live
Stock Products Act of 1917, and
further promoted in 1920 to be
Chief of Stock Yards Service for
the Dominion Government.

On July 1st, 1923, Mr. Johnston
resigned his position with the
Dominion Government to become
Agricultural Agent for the C.N.R.,
and was appointed General Agri-
cultural Agent on Feb. 1st, 1924.
His wide experience with agricul-
tural, live stock, and land settle-
ment matters, and extensive
acquaintance with those directly
interested in such matters, will be
of considerable assistance in the
performance of his new duties,
which, in view of the immense im-
portance of active colonization
work to western Canada, and the
Canadian National Railway, af-
fords almost unlimited scope for
his activity. Among other fea-
tures of the work receiving Mr.
Johnston's personal direction is that
of the Employment Service for
farm help which the Colonization
Department has organized as a
matter of placing newly arrived
immigrants in farm labor.

Vancouver Calls You!

A MILD winter climate, where the mercury seldom drops
to freezing—the temperature averages 52.1. Bayside,
snow-capped mountains ever in view; scenic panor-
amas over paved highways—flanked on both sides
with gigantic trees, courtesies add the tang of the
sea—the harbor every day with shipping, from the
palatial ocean liner to the sturdy fisherman's
smacks; natural fountains, parks and gorgeous,
swimming company. All within easy
reach of the city. There's enjoyment
and amusement for young and old—
golf; theatre; ice hockey; beau-
tiful picture playhouses; music
and song by the world's great
artists. Holiday in Canada's
Pacific Gateway—no head
tax; no immigration
restrictions; no "red
tape."

Another PRICE Suggestion Biscuits, Buns and Rolls

**DR. PRICE'S
CREAM
Baking Powder**

**MADE FROM CREAM OF TARTAR, derived
from grapes. Pure, wholesome and
unvarying in strength. Raises the
dough perfectly.**

BISCUITS
2 cups flour
1 teaspoon Dr. Price's
Baking Powder
1/2 teaspoon salt
2 tablespoons shortening
1/4 cup molasses (or half milk
and half water)

Sift together flour, baking pow-
der and salt; add shortening and
rub in very lightly; add liquid
only to make soft dough; roll or
pat out on floured board to about
one-half inch in thickness (handle
as little as possible); cut with pat-
tern cutter. Bake in hot oven 15
to 20 minutes.

CINNAMON BUNS
2 1/2 cups flour
1 teaspoon salt
1 teaspoon Dr. Price's
Baking Powder
1/2 cup water
1 egg
1 cup sugar
2 teaspoons cinnamon
1 tablespoon melted butter

Sift 2 tablespoons of measured
sugar with flour, salt and baking
powder; rub shortening in lightly;
add beaten egg to water and add
slowly. Roll out 1/4 inch thick on
floured board; brush with melted
butter; sprinkle with sugar, cinna-
mon and raisins. Roll up as for jelly
rolls; cut into 1 1/2 inch pieces,
place with cut edge up on well-
greased pan; sprinkle with a little
sugar and cinnamon. Bake in
moderate oven 10 to 15 minutes;
remove from pan at once.

PARKER HOUSE ROLLS
4 cups flour
1 teaspoon salt
6 teaspoons Dr. Price's
Baking Powder
2 to 4 tablespoons shortening
1 1/2 cups milk

Sift flour, salt and baking powder
together. Add melted shortening
to milk and add slowly to dry in-
gredients stirring until smooth.
Knead lightly on floured board and
roll out 1/4 inch thick. Cut with
biscuit cutter. Grease each circle
with back of knife, one side of
center. Butter the small section
and fold larger part over the small.
Place one inch apart in
greased pan. Allow to stand 15
minutes in warm place. Brush
each with melted butter and bake
in moderate oven 15 to 20 minutes.

Problem Of Convicted Persons

Dr. J. O. Shearer, Social Service

Probation of adult criminals who are before a court for sentence after conviction for some offence, is new in Canada. It has for years been used in the juvenile courts, but it was not until 1921 that it got providing for the probation of adult persons in Canada was passed, on the 14th of June, 1921, in the House of Commons.

What is meant by probation? Not parole, or extrajudicial permit, or discharge, but, of which are methods of dealing with persons who are serving time in prison for some offence of which they have been convicted. Probation applies only to a convicted person in lieu of imprisonment for a stated period. Suppose a young man of previous good record has been convicted on a charge of theft or fraud, in the juvenile court, but it was not until 1921 that it got providing for the probation of adult persons in Canada was passed, on the 14th of June, 1921, in the House of Commons.

(1) Let him out on suspended sentence. (2) Put him out on probation under a designated officer, naming such conditions as he considers who, such as he must do whatever the probation officer requires of him, accept a job secured for him, allow the officer to visit his wages, report at regular intervals to the officer, etc. (3) He must agree that his wages shall go to the support of his wife, family, or dependents.

(4) Determine the duration of his probation, or make it indefinite, or discharge him on the expiration of the bona fides of the matter good intentions and sufficiency of his discipline, (the man is then entirely free as far as the legal consequences of his offence are concerned).

(5) Order him to make restitution or the offence in full.

Probation thus serves several purposes in cases concerned: (a) Saves the convicted person the stigma of having become a "road bird" and makes it easier for him to regain his self-respect; (b) It provides for the community; (c) to constitute an economic saving to the state; (d) in the individual case in Ontario at the rate of \$50 per year whereas in prison he would cost \$200; (e) to make reform and lasting good conduct more easy and probable, which should be the aim of the state; (f) administration of justice; (g) it gives, however, a punishment of the kind which shows that they are not deserving of total confidence.

How does it work? It is in actual operation only in Ontario for the reason that in all other provinces has been a probation system and provided probation officers. It might not be impossible, but it would be difficult to operate the system without employed officers, and the ordinary policeman would not serve as ideal or even an efficient probation officer. It is in fact, however, a punishment of the kind which shows that they are not deserving of total confidence.

The Probation Association of Toronto and York County recently listed its first annual report. This shows that 436 persons were placed on probation, 245 men and 191 women. Of these, 157 were under 20 years of age, 125 were between 20 and 25, and 121 over 25. 425 persons were dependent on others for support. Ninety-six per cent lived up to the regulations. The remaining 4 per cent were brought back and sentenced. It does, therefore, really work. Ought it not to be introduced in the other provinces of Canada?

Historic Fire Recalled

Ninety Years Ago British House of Commons Burned

It is a little over ninety years ago since the original House of Commons in Parliament were burned down. The overthrowing of a fire in the House of Commons, it is said, by the burning of an accumulation of old and elegant tapestries caused a conflagration, resulting in the destruction of the House of Commons. Ninety-six years ago, when the centre of national and imperial government. The present House of Commons were built five years later, and completed for occupation in 1862.

Blind in Germany Organized

Blind men of Vienna have organized a protective association, holding monthly meetings in a public hall. The association is for the purpose of blind men, the members enjoy social activities. Recently they sang at a festival given.

The willingness of a new office boy to offer any man a new job is the willingness of an old one.

The Prince and Argentina

Announcement of Proposed Visit to Argentina is Pleasing to Latin America

Announcement of the Prince of Wales' intention to visit Argentina next year has touched the imagination of all the Argentine people. The visit of the Prince to Argentina is a policy. The visit of the Prince to Argentina is a policy. The visit of the Prince to Argentina is a policy.

Additional timeliness will be given the event by the hundredth anniversary of the treaty of friendship and commerce between Great Britain and Argentina signed in 1825. A writer in the London Times describes the visit of the Prince to Argentina as a political recognition from Europe of the hard-earned independence of the Spanish colonies was long withheld in consequence of ancient prejudices and political intrigues, at a time when the spirit of Spain was more susceptible of the influence of the new ideas which have been in her history days, when she could have afforded to ignore the jealousies of her rivals. Having overcome the objections of King George IV, Canning signed the necessary instructions to Mr. Woodhouse Parish, then British minister to Buenos Aires, with the result that the Anglo-Argentine treaty was signed in that city on February 2, 1825. Great Britain was thus the first of the Old World nations officially to recognize and welcome the birth of the young Republic. When King George IV, the first son of the American Minister to the King, he said: "Sir, I bring to you the representative of a New World." Great Britain was the first to recognize Argentina and Argentina in 1825, and arbitrated the dispute between Argentina and Chile over the Andes frontier in 1903.—Toronto Globe.

An Interesting Find

Marble Head of Augustus Caesar Found at Bottom of Hudson River

Mystery surrounding the marble head of Augustus Caesar which was drawn up from the Hudson River, is now on the minds of the people of New York City. The head was found at the bottom of the Hudson River, and it is now on the minds of the people of New York City. The head was found at the bottom of the Hudson River, and it is now on the minds of the people of New York City.

Filming the West

American Film Companies Will Be On Location in Manitoba

An increasingly large number of American film companies are coming to Western Canada to get the real "atmosphere" for their pictures. The film companies are coming to Western Canada to get the real "atmosphere" for their pictures. The film companies are coming to Western Canada to get the real "atmosphere" for their pictures.

Europe's Secret Service Men

More on Continent Than They Before the War

Confidential travellers are finally of the opinion that more men and women born on secret service are roving about Europe today than was the case before the war. Confidential travellers are finally of the opinion that more men and women born on secret service are roving about Europe today than was the case before the war.

Impersonator Poole Grows

Many admirers grew following the trip of the impersonator, known as "Judy" about the lobby of the Hotel Savoy, London, for several hours on the 14th of June.

Literary Work

Little Bessie admitted her sister's call and after exchanging kind remarks returned. "Sister's nearly ready," she reported, "she's just writing on her cypher."—Herald Tribune.

A Novel Poster Display Invention

By the click of machinery in the space of a minute a poster is changed from the Orient to the Plains of Abraham, from the adventures of a knight in armor to the adventures of a modern-day hero.

Created Province in 1905

The two provinces of Saskatchewan and Alberta were created by Act of Parliament, passed during the session of 1905. The acts went into operation on September 1 of that year, and Saskatchewan and Alberta became autonomous provinces, with complete provincial executives and legislatures.

Widowhood with Two Children

Widowhood with two children has been invented in France to generate electricity for light and power.

The easiest way of making a shadow

is to stand in your own sunlight.

A man in Brighton, England, waits

five miles in his sleep.

Reducing Britain's Pension List

Re-marriage of War Widows Decreases Payments By £8,000,000 Says Labor Report

Straight lines from the Pension List have reduced the number of Britain's war widows by 38 per cent, and decreased the annual expenditure on the list by £8,000,000, the latest departmental report reveals.

The Government's pension list of widows and their children is smaller than it has been since 1917, although there are 231,000 widows and their children still living in Britain, but these are rapidly being reduced as they grow up past the limit for Government aid.

Romance in New York

Lack of Dime Resulted in Long Sought After Love

Here's a New York romance for you. The first time he saw her was on a Broadway car and she was on the pavement. The second time he saw her was on a subway car and she was on the pavement. The third time he saw her was on a subway car and she was on the pavement.

Dispute Sockeye Eggs

Moved From Re-establishment Salmon in Upper Fraser River

With a view to re-establishing sockeye salmon in the Upper Fraser River, the British Columbia Department of Marine and Fisheries has ordered 1,000,000 sockeye eggs to be planted in the river.

Production Precedes Pay

Solution of Industrial Problem Depends on Increased Production

"Class warfare" as Mr. J. H. Thomas, Mr. J. R. Clynes and others have repeatedly warned the wage-earners, and national industrial peace. The solution of the industrial problems is mainly in raising the standard of production and increasing the output of goods.

Hearing Worms Grow

A South African scientist has been able to detect the sounds made by worms as they gnawed at fruit. This he did by connecting an ordinary wireless microphone to an apple.

Krupp's Making Steel Teeth

Teeth made from chromium steel have been added to the products of the Krupp works at Essen, Germany. The metal is from the same mixture formerly used in making German cannon.

Should Make the Parliament Fit the Crime

One who "pulls a gun" in public is subject to arrest and punishment. It does not matter that he may have no felonious intent. Or, he may shoot with intent to commit murder yet kill no one. If he is captured and gets the law, he will know, and the public will know, that he did an unlawful thing. In either case the object of the law is to prevent crime.

Western Grain Crop

Revised statistics of the crop yields of the three prairie provinces were announced recently by the Northwest Grain Dealers' Association. The total wheat crop was given as 211,617,000 bushels, which does not vary greatly with the earlier estimate of the association issued last October 3. Oats were given as 290,116,000 bushels; barley, 125,535,000 bushels; and rye, 5,525,000 bushels.

Wheat Growers May Run Asks

Methodist Church News

Anniversary services will be held on Sunday next, February 15, with special and appropriate services morning, afternoon, and evening.

In the morning at 11 o'clock the pastor will preach on the subject, "The Church in the Life of Today."

In the afternoon at 3 o'clock a special Young People's Rally will be addressed by Mrs. Nellie L. McTung of Calgary, on the subject, "The Development of Personality." This meeting is being held under the joint auspices of the Y. P. C. and the S. C. M. of the School of Agriculture, and it is hoped that all the young people of the community will be present. Special music will be provided.

In the evening at 7:30 o'clock Mrs. McTung will be the speaker and her subject will be "The Romanism of Missions."

A cordial invitation is extended to all to enjoy these special services next Sunday.

On Monday evening from 6 to 8 o'clock the Ladies Aid will serve the anniversary dinner in Harrison Hall, and this will be followed by a special program to be given in the church. Mrs. McTung will give her popular lecture on "The Humor of Everyday Life," and special music will also be rendered.

Valentine Dance at C. S. A.

The Student's Council of the School of Agriculture has arranged to hold a valentine dance on Friday evening, February 13th. The decoration, refreshment, and music committees are sparing no efforts to make this one of the best school dances of the year. This dance is open to the public and everyone is invited to come and enjoy an old time St. Valentine's evening. The charges will be \$1.50 per couple, extra ladies 50c, students of C. S. A. 50c. Proceeds from and above the expenses of the dance will be applied to the graduation exercises at the close of the term.

IN THE DISTRICT COURT OF THE DISTRICT OF MACLEOD

In the matter of the Estate of Joseph David Larsen, late of Claresholm, in the Province of Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims upon the Estate of the above named Joseph D. Larsen, who died on the 5th day of June, A. D. 1924, are required to file with Minnie D. Larsen, of Claresholm, in the Province of Alberta, on or before the 15th day of March, A. D. 1925, a full statement, duly verified, of their claims, or of any security held by them, and after that date the Executor will distribute the assets of the deceased amongst the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to her knowledge.

Dated at Claresholm, in the Province of Alberta, this 8th day of January, A. D. 1925.

GUELPH'S FIRST HOUSE TO BE RESTORED

At the instance of the Wellington Historical Society, the old Guelph building of Guelph, Ontario, erected nearly a century ago by John Galt, the founder of that city is to be restored. The various traditions in Guelph have offered to contribute to the restoration and an energetic committee is now being organized among the citizens to raise the balance of the money required to rebuild in English the building as it stood on completion ninety seven years ago. The old building was removed from its original site many years ago, and some of the original stones were replaced with new ones, but there are still many of the timbers remaining that were placed in position by the Canada Company's agent in 1827. For some years the old Guelph building was utilized as a passenger station by the Canadian Pacific, but it was abandoned as a station when the town of Guelph station was built. Tradition has it that Galt, taking an axe from one of the staves struck the first blow against the first tree to be felled, after which he and his party took to the bush of Guelph.

Demand is the Cause of Supply
Demand an old and WELL-MATURED whisky and you will get it.

"CANADIAN CLUB"
and
Imperial
WHISKY

are soundly manufactured, old, and well-matured whiskies.
